

## April 7th & 8th Training

### Topics Include

Best practices for residential and commercial inspections

Practical approaches to different inspection scenarios

Professional communication and handling difficult personalities

Identifying common code violations across inspection types

Handling permitting following minor disasters including:

- Flooding
- Storm damage
- Fires
- Vehicles into buildings

Strategies to solve field issues with less reliance on the Building Official

Attendees will leave better prepared to tackle challenging inspections and field situations with confidence.

### Instructor

#### **Cody Richards**

*Director of Client Services | Building Code Solutions*

Cody Richards has over a decade of experience in the building safety industry with extensive field inspection experience on both residential and commercial projects. He holds a **Master's Degree in Public Administration** and is an **ICC Certified Building Official (CBO) and Combination Inspector**.

Having spent countless hours in the field, Cody takes pride in representing "the field inspectors" and is excited to share practical knowledge, strategies, and real-world experience with attendees.
