

June 2026
Training

Chris Kimball, PE, FPE, MCP

Mr. Kimball is a licensed civil, structural, and fire protection engineer and an ICC Master Code Professional. He is ICC-certified as a building official, fire code official, plans examiner, and building inspector, among other roles. A co-founder of Building Code Solutions, Inc., he has reviewed thousands of projects nationwide, teaches as an approved ICC instructor, and has authored several code publications, including the 2018 International Existing Building Code Handbook.

2024 IBC Code Updates & Significant Changes

The 2024 International Building Code (IBC) includes key updates that design and construction professionals need to understand. This course reviews the most significant changes, including structural, fire and life safety, accessibility, means of egress, mechanical, energy, and administrative provisions. Each unit explains what changed, why it matters, and how it affects plan review, inspections, and construction for commercial and mixed-use projects. Ideal for architects, engineers, inspectors, and code officials, the course helps you apply the 2024 IBC accurately and efficiently to keep projects safe, compliant, and on track.

June 16TH or 17TH 2026
